From business confusion to strategic direction.

How to Use This Workbook

Purpose: Complete the workbook honestly, using evidence wherever possible. The goal is not to make the business look good; it is to understand what is true, what is working, what is not, and what must change.

1. Diagnose

Answer the questions based on the current reality of the business.

2. Evidence

Use sales records, customer feedback, financial records and operational data where available.

3. Decide

Identify the few issues that matter most.

4. Prioritise

Do not try to fix everything at once.

5. Act

Convert priorities into measurable 30-, 60- and 90-day actions.

Evidence Rule

Where you are unsure, write “UNKNOWN” rather than guessing. Unknowns become information gaps to resolve.
